Administrative Penalties				
Tru-Kare Tank & Meter Service Ltd.	Lacombe NW-15-40-27-W4	20-Oct-10 Assessed: $1,500.00	AEPEA(R) 110(1)	The Company failed to immediately report a release of a substance, anhydrous ammonia, into the environment that may cause, is causing, or has caused an adverse effect, as soon as it knew or ought to have known of the release. Paid 25 October 2010.
Nadeau, Herve	Westlock County SW-15-58-27-W4	25-Oct-10 Assessed: $5,000.00	WA 142(1)(h) 36(1)	Mr Nadeau conducted an activity without an approval under the Water Act; the dredging of a channel, new channel creation, channel re-alignment and the installation of a large berm across an unnamed creek. The unauthorized activity altered the flow or level of water in the watercourse, has affected the natural drainage patterns and may have changed the location or flow of water during a future flood event. Paid 25 November 2010.
Lafarge Canada Inc.	MD of Bighorn SW-26-24-9-W5 NW-23-24-9-W5	27-Oct-10 Assessed: $2,500.00	AEPEA(R) 227(e)	The Company operates the Exshaw Cement Manufacturing Plant pursuant to Approval #1702-00. Lafarge Canada Inc. contravened its approval by submitting late the test data from the August 26, 2008 stack survey and by failing to meet the 0.20 g/kg limit for particulates on January 14, 2009 as set out within Table 4.1-1 of the Approval. Paid 9 November 2010.
Schacher, Bryce	Mountain View County Plan 577LK, Block A, Lot 1	27-Oct-10 Assessed: $5,000.00	WA 36(1)	Mr. Schacher conducted an activity, the unauthorized construction of a berm and excavation and disturbance of the riverbed and shore of a water body, which has altered or may alter the flow or level of water or has changed or may change the location of water or the direction of flow of water. Paid 22 November 2010.

SemCAMS ULC	Woodlands County 14-59-18-W5 22-59-18-W5 15-59-18-W5 11-59-18-W5	09-Nov-10 Assessed: $21,000.00	AEPEA(R) 227(e)	The Company operates the Kaybob South Beaverhill Lake Gas Unit No. 3 Sour Gas Processing Plant pursuant to an Approval. It contravened its approval, on six occasions, when it released sulphur dioxide from the sulphur recovery process unit incinerator stack at a mass rate in excess of the limit permitted in the Approval. Paid 15 November 2010.
Canadian Natural Resources Limited	MD of Bonnyville	10-Dec-10 Assessed: $12,500.00	AEPEA(R) 227(e)	The Company operates the Primrose and Wolf Lake Enhanced Recovery In-Situ Oil Sands and Heavy Oil Processing Plant and Production Facility pursuant to an Approval. It contravened its approval when it exceeded the daily SO2 emission limit; failed to calculate the sulphur dioxide emitted from the Primrose North on a daily basis; and failed to immediately report a contravention of a term of the Approval. Paid 20 December 2010.

Enforcement Orders				
Schacher, Bryce	Mountain View County Plan 577LK, Block A, Lot 1	21-Oct-10	WA 36(1)	Bryce Schacher is the current owner of the land [the "Private Land"]; immediately adjacent to the east of the private land is a reserve owned by the County of Mountain View [the "Reserve Land"] which is the riparian area bordering the Little Red Deer River. Water flows in the Little Red Deer River past the Reserve Land flowing from south to north. On December 13, 2005, Alberta Environment [AENV] issued a Warning Letter to Mr. Schacher for the unauthorized removal of gravel from the Little Red Deer River bed and constructing a berm on the riverbank adjacent to the Private Land. Inspection and subsequent conversation with Mr. Schacher in November of 2008 concluded that substantial additional disturbance and construction had occurred since 2005. In 2009 AENV advised Mr. Schacher he must either; with AENV approval, remove the berm and restore the bed and bank to pre-disturbance conditions; or, leave the berm in place, but obtain, an assessment of the integrity and the effects of the berm on river hydraulics and possible adverse effects on adjacent property, all to be prepared by a professional engineer. Mr. Schacher advised he wanted to keep the berm in place but to date AENV has never received any of the requested assessments. AENV has never received an application for approval, nor has AENV issued an approval for any of the Activities. Mr. Schacher shall, by August 31, 2011, submit the Berm Assessment; including a survey of the berm, an assessment of whether the berm can withstand a 1:100 year flood event; a detailed list of all necessary modifications to ensure the integrity of the berm in a 1:100 year flood event; and submit a detailed Hydraulics and Impacts Assessment, all of which are to be signed and stamped by a professional engineer.
Agrimax Ltd.	Rocky View County NE-33-27-26-W4	08-Dec-10	AEPEA(R) 227(e)	The Company holds an Approval to operate a fertilizer manufacturing plant on NE 33-27-26-W4M in Rocky View County, near Irricana, Alberta. The Plant is not presently operating due to two fires that caused damage, numerous compliance issues, and ongoing financial difficulties that have resulted in the plant only operating sporadically since it last operated full time in 2004.

Enforcement Actions

Company/Individual	*Municipality / LLD*	*Decision Date/ Penalty*	*Act/ Regulation*	*Comments / Disposition*
Enforcement Orders				
				Agrimax was issued two previous enforcement orders in 2005 under both EPEA and the Water Act for various issues of non-compliance, and due to financial problems did not fully complete all requirements of the EPEA enforcement order (EO-2005/01-SR). More than 6 months have passed since the Plant conducted any operations, and approximately 6 years since it last operated on a full time basis, and Agrimax has failed to submit a Decommissioning Plan and Reclamation Plan as required under its Approval. The Approval is immediately suspended indefinitely until further written notice from the Director; Agrimax, nor any other party on their behalf, shall operate the Plant until this Order has been fully complied with; the Company shall submit a proposal for Facility Upgrades; develop and document a monthly Inspection and Maintenance Program; submit a proposal prepared by a qualified engineering professional to construct an industrial runoff retention pond; include a schedule of implementation; implement the Industrial Runoff Pond Proposal; submit an Engineering Assessment Report; Groundwater Remediation Plan and; a Soil Management and Monitoring Plan.

				an Investigative Plan, submit and implement a Remedial Plan, submit and implement a Reclamation Plan; and apply for a reclamation certificate once the criteria has been met.
719722 Alberta Ltd.	Calmar Plan 8021511, Block 2, Lot 5A Plan 8021511, Block 2, Lot 7 Plan 8021511, Block 2, Lot 6	12-Nov-10	AEPEA(R) 113	719722 Alberta Ltd. is the current registered owner of the lands legally described as Plan 8021511, Block 2, Lots 5A, 6 and 7, in the Town of Calmar, Alberta. The Company operates a service station at which petroleum products are stored and sold to the public. The site was previously owned and operated as a retail gas and service station since approximately 1984, and three original underground storage tanks were installed in the northern portion of the Site. In 1993 the former owner of the Site installed three new underground storage tanks [UST's] on the southern portion of the Site and removed the tanks from the northern portion of the site. An environmental investigation detected petroleum hydrocarbons on the Site, specifically on the northern part of the site where the original UST's had been located. Between 2001 and 2004 the Company conducted additional environmental delineation programs, groundwater well monitoring events and soil sampling in which the presence of petroleum hydrocarbons were detected at the Site from the northern to the southern boundaries, south of the Site, beneath the southwest corner of the building and at the residential properties north of the Site. A complete file review in 2009 confirmed petroleum hydrocarbons present in both soils and groundwater beneath the Site, and in some monitoring wells, the levels are significant; no remediation has taken place; petroleum hydrocarbons have migrated off-Site and have caused soil and groundwater contamination to the residential properties north of the Site; and petroleum hydrocarbons from the Site have contributed to a possible co-mingled contaminant plume. Additional subsurface drilling is required to fully delineate the Substances migrating from the Site to the off-site areas, and that vapour intrusion drilling beneath the buildings on the Site and the buildings to the south of the Site is required to ensure the protection of potential human health receptors. AENV is of the

				Environmental Site Assessment was conducted with the analytical data from the soil and groundwater samples indicating that they were below the then applicable criteria, the report also stated that the inferred groundwater gradient was to the northwest, being toward the alley and the residential properties to the north of the Site. On May 3, 2010, Alberta Environment ["AENV"] sent a letter to Gas Plus regarding contamination originating from the Site to neighbouring property; the letter also requested full delineation of the plume. Gas Plus replied to the letter stating the outcome of their 2006 Investigation with a report dated September 25, 2006 finding evidence of some hydrocarbons in the monitoring wells, but confirming that the predominant groundwater flows are cross-gradient to the Site flowing in an east/north-east direction. Inspection of the site discovered a small leak of hydrocarbons from a pump sump and actions were taken to repair the leak. On August 4, 2010, AENV received a public complaint that gasoline vapours were noticed within the basement of a resident at 6323 Bow Crescent NW, and hydrocarbon vapours were detected by the Fire Department. Immediate measures recommended by Alberta Health Services have not been implemented by the Parties to mitigate the adverse impacts of the substances to the residents and to date; Gas Plus Inc. has not cooperated with the Department to fully delineate offsite impacts resulting from their operation. AENV is of the opinion that a release of substances into the environment has occurred, and that the release has resulted in adverse effect to the Site and to off-site areas to which the Substances are migrating, and that work is required to remediate the adverse effects. The Parties shall immediately implement a Vapour Removal Program and commence an Indoor Air Monitoring Program for 6323 Bow Crescent NW; Submit a Delineation Plan; Submit and Implement a Remediation Program for the Substances and the Contamination and; within 30 days of commencement of the remedial work, submit monthly status reports until otherwise directed by the Director. Notice of Appeal received 10 December 2010 by the Environmental Appeal Board.
